About our publications

The Royal Society of Chemistry publishes 45 peer-reviewed journals, around 2,000 book titles and a collection of online databases and literature updating services.

Our international publishing portfolio covers the core chemical sciences including related fields such as biology, biophysics, energy and environment, engineering, materials, medicine and physics. As a not-for-profit publisher, we reinvest surplus funds back into the global scientific community, supporting our mission to advance excellence in the chemical sciences.

Open access

We provide authors with the option to make their article gold open access in any of our journals. We have five full gold open access journals, *Chemical Science*, *Materials Advances*, *Nanoscale Advances*, *RSC Advances* and *RSC Chemical Biology*, and all our other journals are hybrid - where authors can choose to publish gold open access or publish through the traditional route. We also offer a green open access option after an embargo period.
